DRAWING AND SPARE PART LIST

1. BEFORE USING THE EQUIPMENT AND SECURITY

0

 $Read\ carefully\ the\ instruction\ manual\ and\ practice\ with\ the\ equipment\ before\ the\ application.$

Use the protective devices such as goggles, boots and security gloves.

- Do not exceed the 80% of nominal capacity of the equipment during its utilization.

 Make the operations in well-lighted and stable area and look for safety location to the operators.
- Block the load mechanically once the application is done avoiding the operation underneath.
- Use all the supporting area of the hydraulic jack as in the saddle as in the toe.
- Prevent the use of tilting saddles if the risk of side load is present.

Do not expose the equipment to intense heat sources such as welding.

Do the maintenance operations with free load equipments and in clean and well-lighted areas.

- Once the operation is finished, check for damages in the equipment, clean and store it in a safety way.
- > A bad connection of the plugs, etc. could produce a bad function of the equipment and could create dangerous situations.
- Do not modify the equipment (welded parts, lever...) without manufacturer's consent. Do not use the hoses for transport operations.
- > Before start any operation, make sure that: the installation is well done, the safety of the workstation for the operator and assure that no authorized personnel could access to the exposed area.
- > Therefore the operator must be perfectly trained in the use of the equipment and acts under the logical security standards that the movement of heavy loads includes.

2. WARRANTY

LARZEP, S.A. guarantees its products against all design and manufacturing defects for the durations of two years from the date of purchase.

This guarantee does not include the ordinary wear of both metal and non-metal parts, abuse, using the equipment beyond its rated capacity and any wear or damage incurred as a result of using a hydraulic fluid which is not recommended by **LARZEP, S.A.** Please note that if the equipment is disassembled or serviced by anyone other than an authorized service dealer or by **LARZEP, S.A.**, this guarantee is rendered null and void.

In the event of a warranty claim, return the equipment, to LARZEP, S.A. or the authorized dealer which sold you the hydraulic equipment, LARZEP, S.A. will repair or replace the faulty equipment, whichever is deemed most appropriate. LARZEP, S.A. shall not be held liable for any consequential damages or losses, which may occur as a result of faulty equipment.

3. TECHNICAL FEATURES

MODELS	SADDLE CAPACITY	TOE CAPACITY	STROKE	TOE HEIGHT	COLLAPSED HEIGHT	WEIGHT
AU00518	5 ton	5 ton	178 mm	41 mm	330 mm	20,6 kg
AU02015	20 ton	8 ton	152 mm	67 mm	276 mm	14,5 kg
AU02030	20 ton	8 ton	305 mm	67 mm	452 mm	22,2 kg
AU03015	30 ton	12 ton	152 mm	73 mm	281 mm	20,3 kg
AU03030	30 ton	12 ton	305 mm	73 mm	470 mm	31,0 kg
AU06015	60 ton	24 ton	152 mm	73 mm	327 mm	43,1 kg
AU06030	60 ton	24 ton	305 mm	73 mm	533 mm	64,9 kg

4. START- UP

The LARZEP hydraulic toe jacks are compact, easy-handle and light-weighted for easy transport, especially suite to load elevation in confined spaces.

To start-up it is enough to introduce the lever in the back side of the jack, there are three positions to optimize the ergonomics, and pump several times until you reach the wished height.

To lower the load, you have to release the lever and find the release screw. Turn this screw in anticlockwise sense to return the piston and the load.

The return speed depends on the angle of turn initially. To avoid unwanted movements open it in small angle.

Release the lever after using the jack and store it with retracted piston and in vertical position.

5. MAINTENANCE

The jack works normally in environmental standard conditions, if the proposal temperatures are very extreme and they exceed the -20° or +50°C, consult the manufacturer.

Checking the oil level, release the dipstick and see for the level, it is labelled with the maximum of oil, never superior to 5 mm by excess or defect of this mark. Use hydraulic oil of high quality HVI ISO32 viscosity; make sure that is not dirty inside the oil we must add to the jack.
